

! Solutions for tomorrow AB is looking for Mechanical Designer/System Engineer

Solutions for tomorrow AB develops unique and innovative mobile x-ray equipment for future healthcare. The vision is to take the x-ray to patients – in hospitals, retirement homes, health centers also in developing countries.

The first product was launched in 2016 and the company is growing rapidly and now we are fourteen full-time employees in organization in addition to network resources and partners. We work internationally and worldwide with customers like Canon Medical and Konica Minolta. Production is placed in our facility in Väckelsång. ALMI Invest and Entreprenörinvest Sverige AB are partners in the company.

We build our business on commitment, genuine interest in technology as well as strong driving force to improve healthcare worldwide. We value you as an individual and we are grateful that everyone will enjoy and thus perform their utmost.

We are now investing and expanding our company. We are looking for a mechanical engineer who works effectively with head and hands. Your title will be system engineer and you are going to work with mechanical design and efficiency of production. You enjoy responsibility, international contacts and want to grow together with the company. You will have an opportunity to become a project leader and manage resources and suppliers.

We believe you are educated as engineer, civil engineer or equivalent. Important for us is that you have interest of product and how it is used and developed. What you do and work with is important for you and you truly involved in tasks and the company. We believe you are interested in construction, mechanics, engineering, vehicles, crafts or similar.

Applications should be sent to info@solutionsfortomorrow.se The company is located in Väckelsång, between Växjö and Tingsryd, close to nature with accommodations that offer great quality of life and good prices.

Processing of applications is ongoing. The company has collective agreements.

For more information – call Mattias Guldstrand, CEO, phone: 010 456 4501

Work with us is a journey.

Join, make a difference and take the X-ray equipment to patients!
